

Download this, extract it to your C:\ drive (literally just C:\ in the pathway to extract to)

<https://www.gyan.dev/ffmpeg/builds/ffmpeg-release-essentials.zip>

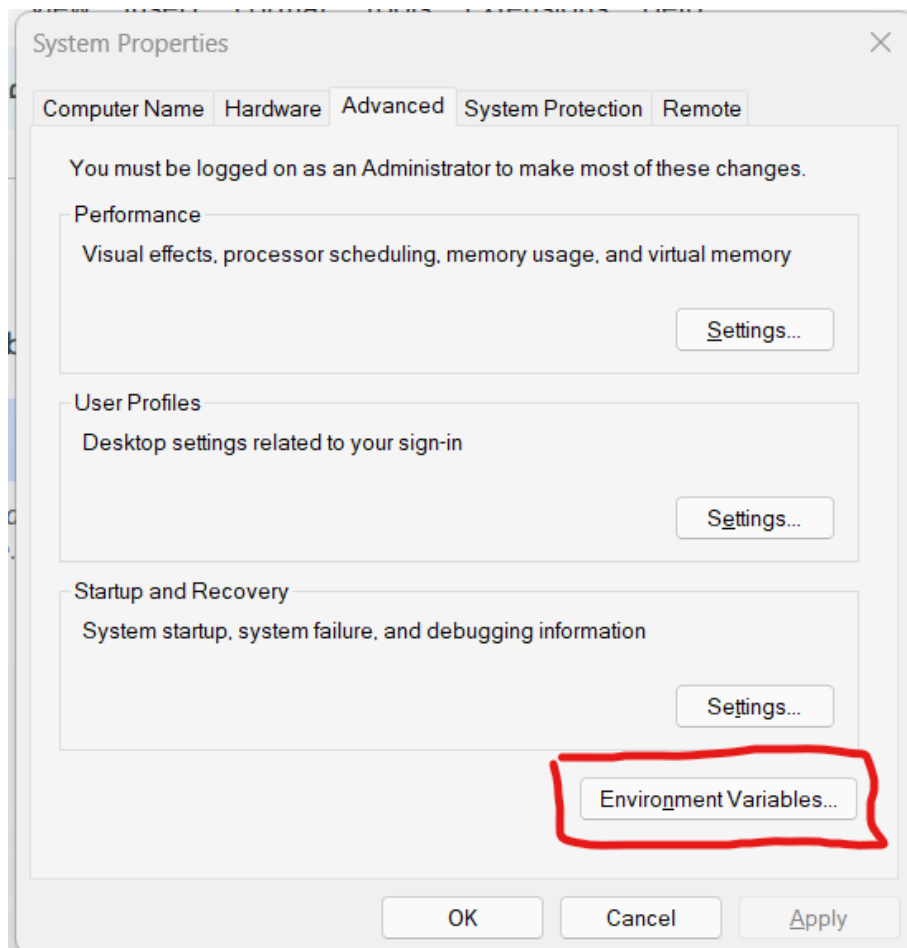

press windows button and type " control panel ", open control panel.

in the search bar in top right corner, type " environment " .

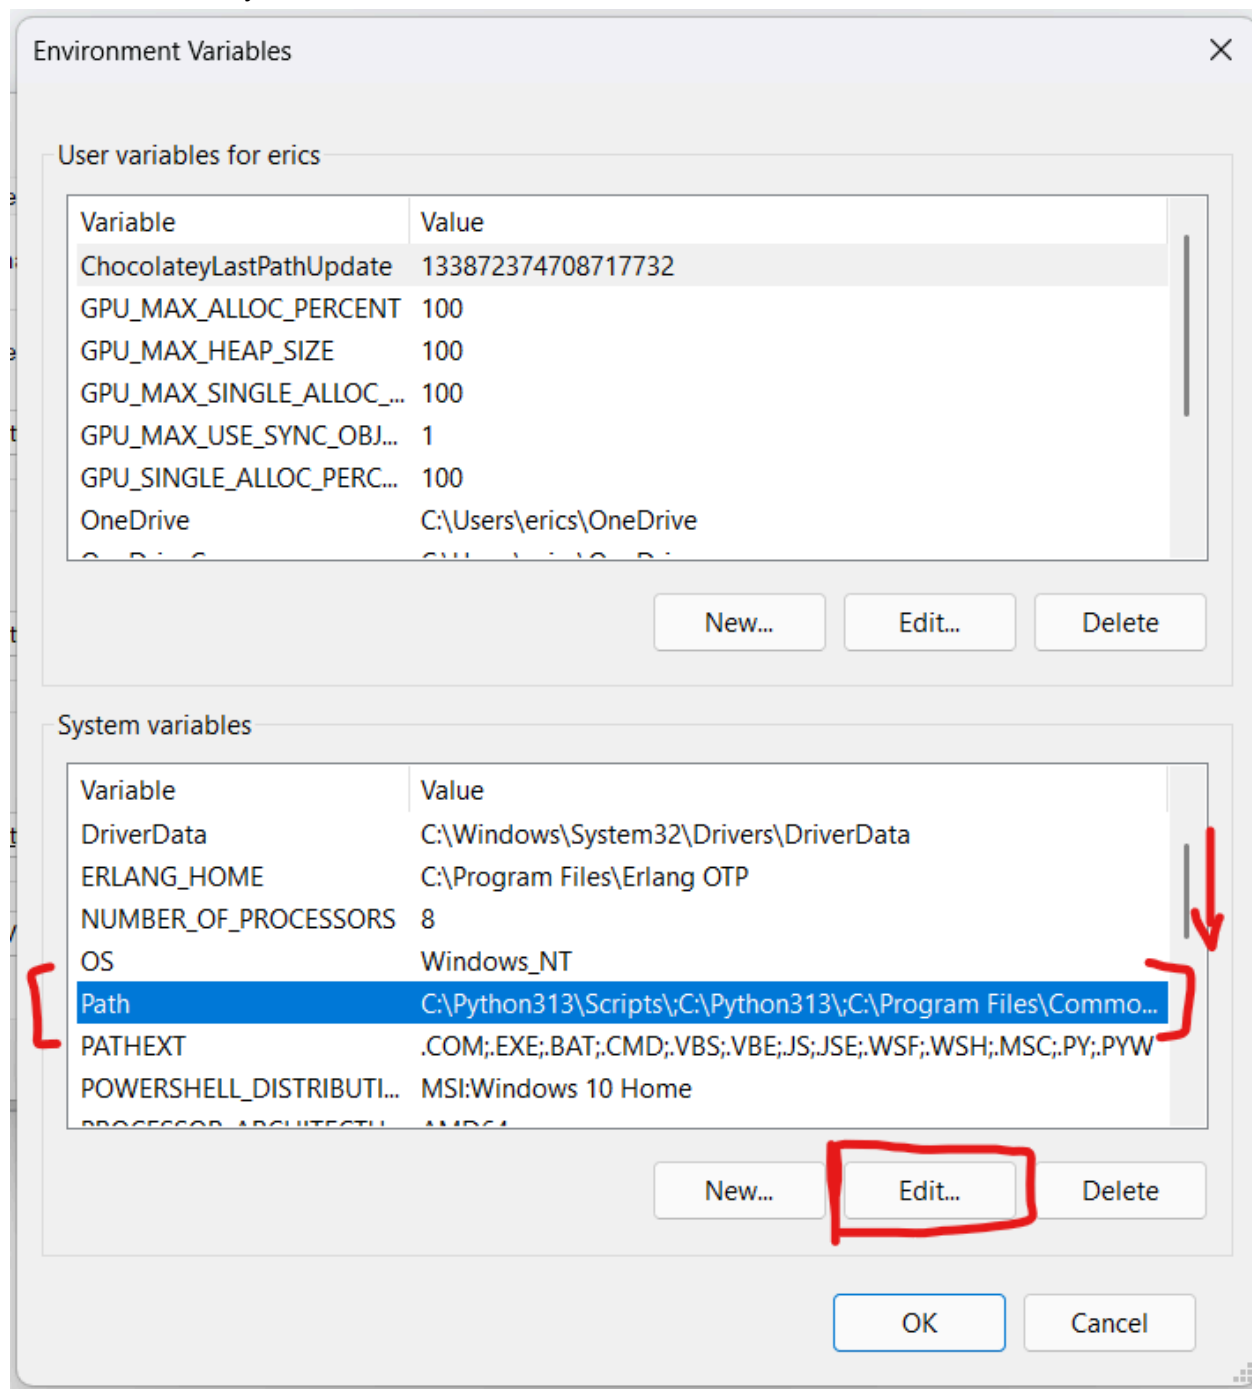

click "Edit the system environment variables"

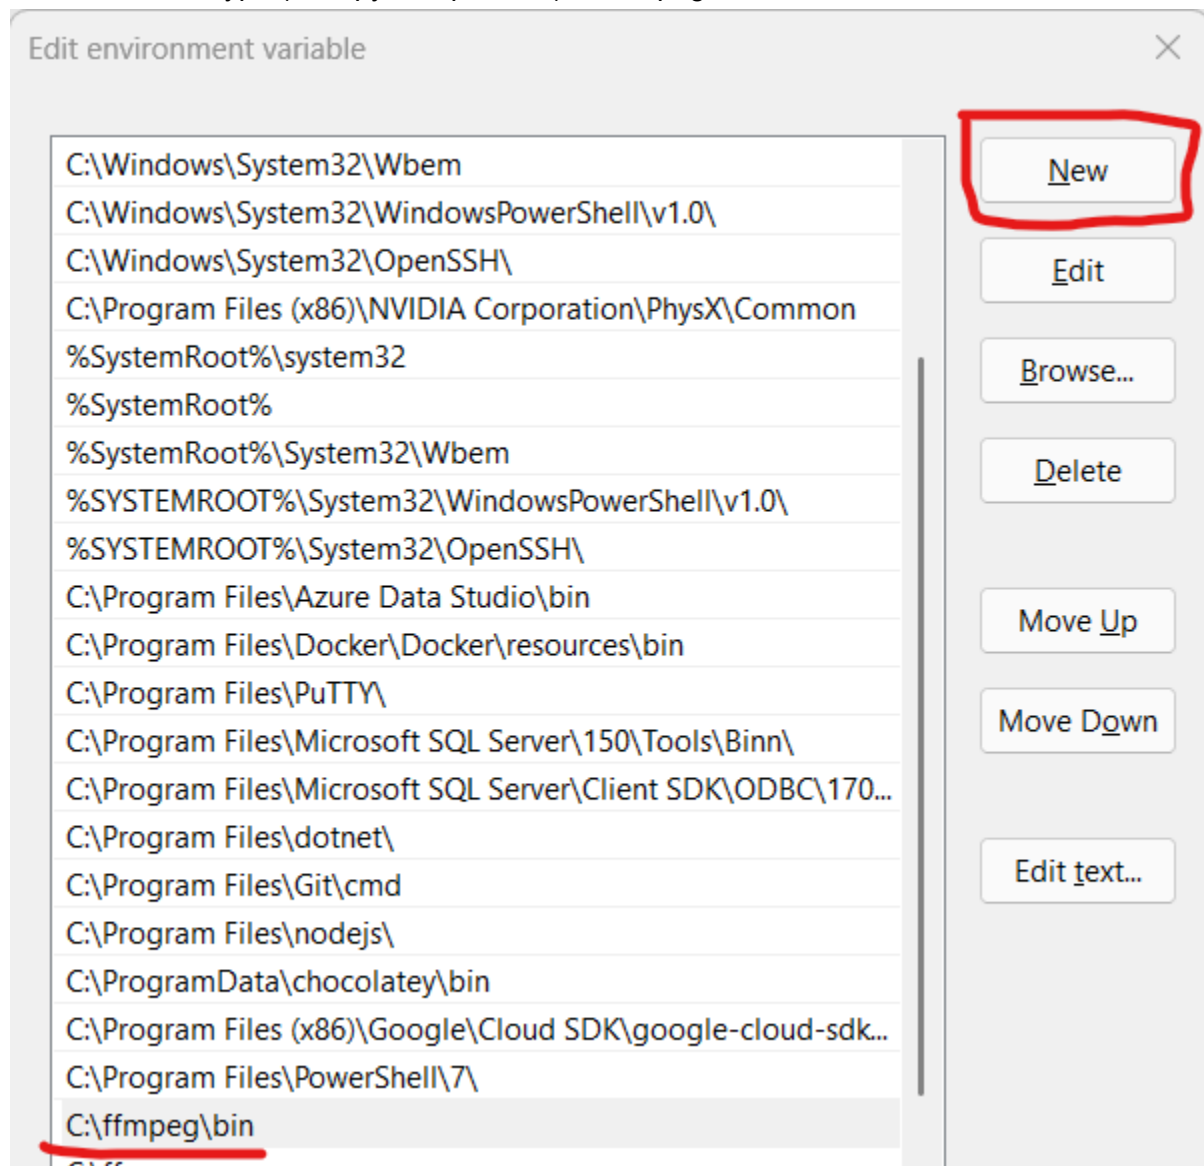

Click environment variables

Scroll down the "System variables" list and click on "Path", then click Edit

Click New, then type (or copy and paste in) C:\ffmpeg\bin

Click ok on windows to exit
